SUMMARY

ASP.NET Core Developer with hands-on experience building two full-stack web applications using C#, ASP.NET Core MVC, Web API, Entity Framework Core, and SQL Server. Skilled in implementing authentication, role-based access control, dependency injection, LINQ, and RESTful APIs. Contributor to the developer community with 10+ published technical articles that have received over 1,200 views on Dev.to. Eager to bring strong backend fundamentals and a problem-solving mindset to a real-world engineering team.

TECHNICAL SKILLS

Backend Development: C#, .NET Core, ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework Core, LINQ, RESTful APIs

Frontend Development: HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript, jQuery, Basic Angular

Database & Data Access: SQL Server, ADO.NET, Stored Procedures

Tools & Platforms: Visual Studio, Visual Studio Code, SSMS, Git, GitHub, Swagger

Concepts: OOP, Dependency Injection, Authentication & Authorization, DTO, CORS, Async/Await

SOFT SKILLS

Communication | **Problem-Solving** | Logical Thinking

PROJECTS

Employee Management System

Technologies: ASP.NET Core MVC | Entity Framework Core | SQL Server | Bootstrap

- Built a full-stack Employee Management System with Employee and Department modules using ASP.NET Core MVC, Entity Framework Core, and SQL Server.
- Developed** CRUD operations for Employee and Department modules using Entity Framework Core and LINQ for efficient data retrieval and manipulation.
- Used asynchronous programming (async/await) in the service and controller layers to improve application responsiveness and avoid blocking database operations.
- Designed a responsive UI using Bootstrap and **applied** client-side (jQuery Validation) and server-side (Data Annotations) form validation.
- Enforced** role-based access control to restrict module access based on user roles such as Admin and Employee, enhancing application security and authorization.

PGPulse

Technologies: ASP.NET Core | Entity Framework Core | SQL Server

- Built PGPulse, a hostel and PG accommodation platform where users can search properties, view details, submit ratings, and write reviews.
- Integrated** secure authentication and authorization using ASP.NET Core Identity, enabling user registration, login, role-based access control, and session management.
- Applied client-side and server-side validation using jQuery Validation and Data Annotations to prevent invalid user input.
- Developed a ratings and reviews module that **enables** users to submit ratings and reviews for properties.
- Designed a SQL Server database schema using Entity Framework Core for managing hostels, users, reviews, and ratings.

ACHIEVEMENTS

- Published 10+ technical articles on Dev.to covering ASP.NET Core, C#, LINQ, Entity Framework Core, and SQL Server.
- Generated over 1,200 cumulative views across published technical articles.

CERTIFICATIONS

.NET Full Stack Developer – NareshIT | Aug 2025 – Apr 2026

- Built **three** ASP.NET Core MVC applications using Entity Framework Core, LINQ, SQL Server, and CRUD operations.
- Developed RESTful Web APIs using ASP.NET Core with CRUD operations, Swagger/OpenAPI testing, and SQL Server integration.

Foundational C# with Microsoft – freeCodeCamp (Nov 2023)

ASP.NET Core MVC – Udemy (Jul 2026)

EDUCATION

MCA, Shri Swami Samarth Institute, Ahilyanagar | 2023–2025 | CGPA: 7.19

BCA, New Arts, Commerce and Science College, Ahilyanagar | 2020–2023 | CGPA: 7.97

LANGUAGES

English | Hindi | Marathi
